

Setting the New Standard

inSight

inSight for Post Acute Care

Designed by clinicians for clinicians, eKare inSight™ combines our proprietary computer vision technology with Apple iPad to deliver the best-in-class 3D assessment and documentation right at your fingertips. We understand the limitations with the current wound care practice. That is why we designed our solution with one priority in mind simplicity.

From skilled nursing facilities to LTC hospitals to home-care, inSight helps to ensure compliance, quality assurance, and liability prevention through workflow optimization and automated reporting.

Frequently Asked Questions

- ❓ Can I integrate inSight with my current EHR?**
Yes. inSight is already integrated with some of the largest EHR providers for SNF.
- ❓ Do I need internet connection to use inSight?**
No. inSight has store-and-forward capability that allows the system to be used without internet connection.
- ❓ How can I trust that inSight is accurate and reliable?**
inSight is both FDA registered and CE marked. The system has gone through stringent technical and clinical validation. For details, please visit www.ekareinc.com/research.
- ❓ How long does it take to measure a wound using inSight?**
Under 10 seconds.
- ❓ Do I need any specialized training to use inSight?**
No. If you know how to take a photo using a tablet, you can operate inSight.

Tetimonials

"What inSight is capable of is unprecedented. It transformed how we deliver wound care for better quality and higher efficiency."

Alex Solovey, CEO, Cassena Care

"It's amazing how quick and intuitive [inSight] is. More importantly, I am getting accurate measurements that I can confidently rely on for clinical management."

Suzanne Lee-Allen, Wound Care Nurse, The Glenhaven Organization
